TECHNICAL SKILLS

Programming Languages: Java, Python, Kotlin, JavaScript, CSS, HTML, Bash

Frameworks & Libraries: ReactJS, Angular, Node.js, Spring Boot, Hibernate, Spring Security, Spring Cloud

Databases & Technologies: MySQL, Azure SQL, Cassandra, MongoDB, RabbitMQ, Kafka, Firebase, REST API

DevOps & Tools: Docker, Kubernetes, GitHub Actions, AWS EC2, Apache Tomcat, Grafana, OpenObserve, Looper

WORK EXPERIENCE

Walmart Global Tech- Backend Software Developer (Contract) | Sunnyvale, CA

Apr 2025 - Feb 2026

- Designed and maintained **microservices** in the Product Setup Team (asset setup for item validation and image classification for quality enforcement), ensuring reliability of Walmart's e-commerce platform serving **100M+** SKUs and processing millions of item updates daily.
- Engineered and deployed **Spring Boot** microservices with **Kafka**, **Azure SQL DB**, and **Cassandra** for Product Setup ingestion pipelines; improved reliability through post-release tuning and error handling, reducing pipeline processing failures by **~40%** during peak ingestion windows.
- Implemented pod-level rate limiting to handle **400+** requests per second traffic bursts, reducing 5xx errors by **~25%** and improving service stability during seasonal peaks (e.g., Black Friday / Cyber Monday).
- Resolved critical production issues by implementing mandatory header enforcement and validation, ensuring consistent request compatibility and stable seller product onboarding workflows across **100%** of daily API calls.
- Collaborated with DevOps to decommission legacy cloud clusters, reintroduce upgraded environments, and retire an Azure SQL DB, eliminating redundant infrastructure and saving **\$9,000+** annually in recurring cloud costs.
- Optimized code quality by reducing **SonarQube** code smells by **40%** (**300+** major/critical issues) across multiple services, reducing PR rework by **~25%** and improving long-term maintainability.
- Streamlined **CI/CD** pipelines by automating builds and promotions across environments, integrating Slack-based stage notifications, and enforcing validation/approval gates to support reliable production releases.

TPR Education, LLC at Tutor.com - Java/Python Tutor | Remote

Aug 2023 - Apr 2025

- Delivered **600+** 1:1 tutoring sessions in Java and Python, strengthening student mastery of core CS topics including OOP, data structures, debugging, and algorithmic problem-solving.
- Conducted tailored lesson plans based on individual learning needs, maintaining **95%+** positive student feedback and improving student confidence and coding performance over time.

PROJECTS

Tree Personality Quiz Platform - Full Stack Developer

Mar 2026

Java, Spring Boot, Spring Data, PostgreSQL, AWS Elastic Beanstalk, Amazon RDS, GoDaddy DNS, [Git](#)

- Architected and deployed a production-grade web application using **Spring Boot**, designing RESTful services for quiz evaluation and real-time result computation.
- Provisioned and integrated **Amazon RDS (PostgreSQL)**, leveraging Hibernate for schema management.
- Deployed and operated the service on **AWS Elastic Beanstalk**, configuring environment variables, VPC networking, and security groups to ensure reliable cloud execution.
- Supported **200+** quiz submissions while maintaining reliable performance under concurrent usage.

NutriTrack: Nutrition and Fitness Tracker - Android Developer

Mar 2024

Kotlin, Android SDK, Retrofit, Google Material Design, Graph API, API Ninjas, Firebase, [Git](#)

- Developed a nutrition app using **Firebase** Realtime Database and **OAuth** authentication with a team of developers.
- Integrated API Ninjas to fetch 953K+ grocery items and 191K+ restaurant items, enabling accurate dietary tracking.

EDUCATION

Boston University

Bachelor of Arts in Computer Science

Boston, MA

Graduation: Aug 2024
